

Business Healthcheck

Combining three powerful diagnostic tools we develop a detailed report of your organisations strengths and areas for improvement; **Winning Measures, EFQM Business Excellence Model and Wave Innovation & Growth Diagnostic.**

The combination of these three diagnostic tools allow you to establish key cause and effect relationships within your organisation. We then work with you to develop a prioritised action plan using a recognised best practice process designed by InvestNI that ensures sustainable improvement.

Benchmarking: The performance of our organisations only becomes truly meaningful when we compare it to others. This is the very essence of competition and failure to look at others means we are at best surviving and definitely not competing. The Benchmarking process uses a simple data collection form with full explanation of the terms and where the data should come from.

Innovation & Growth Assessment: Wave® is the best tool we have found to assess the readiness of a company for innovation and growth. Based on academic research into what factors are required for innovation and growth and used in more than 15 countries, Wave® has a high degree of correlation to financial outputs. Wave® assesses, measures and benchmarks your business capabilities. Wave® measures what matters and delivers better results from “today’s business” and “tomorrow’s business”.

Business Excellence Assessment: The EFQM Business Excellence Model is a framework that allows you to compare your organisations performance in nine key areas against recognised best practice. As a diagnostic tool the Excellence Model is a non-prescriptive framework allowing it to be adapted for all sectors and sizes of organisations. Through a combination of interviews and focus groups we use the model to get under the skin of your organisation and make sure you are “walking the talk”.

Assessment Process

The Business Healthcheck assessment is delivered in a timescale dependent on the size of your organisation and your needs and involves:

Benchmark: Comparing your performance to your peers

Innovation & Growth Assessment: Assessing your readiness for innovation & growth

Business Excellence Assessment: Focus groups and interviews to understand your business performance against recognised best practice

Deliverables

- An in-depth assessment of your business’ collating information from 3 powerful assessment tools.
- Identification of strengths and areas for improvement within your business.
- Creation of a prioritised action plan.

Who should be involved?

The Business Healthcheck is a strategic assessment tool and we recommend that a cross functional team of senior managers are involved. Involving the people who are responsible for the success of the business will ensure you receive maximum benefit from the process.
