

Lean Accounting

As businesses progress along their lean journey they find that traditional accounting practices do not support the deployment of lean tools and techniques. Lean Accounting is accounting for the Lean enterprise, it moves from traditional cost accounting to a system that measures and motivates good business practices in the lean enterprise by reducing waste through continuous improvement.

Our Lean Accounting workshops educate and train your people, giving them the knowledge and confidence to utilise lean accounting methods in daily operations. Our workshop will provide an understanding of tools, methods and processes to provide accurate, timely, and understandable information. Examining how lean tools can eliminate waste from accounting processes and demonstrate by investing in people, how the lean culture empowers continuous improvement at every level of the organisation.

Pragmatique have implemented Lean Thinking in manufacturing, engineering, pharmaceutical and service environments. Our clients have included 3M, Corus, Caterpillar, Sanofi Aventis and many other firms to achieve quality improvements, cost reductions and delivery schedule improvements. A key element of success is the ability to effectively measure and therefore influence the benefits of the Lean Enterprise through accounting and measurement.

What we give you is a deep understanding of accounting and measurement within the Lean Enterprise and how Lean Accounting can support the implementation of Lean tools and techniques in your organisation. We will demonstrate the direct link of these tools to Value Stream Costing and continuous improvement in general through our practical exercises. We have a growing experience to tailor the workshop directly to the needs of your organisation as we have supported the implementation of Lean tools and measurements across many industries.

Duration

The Lean Accounting workshop is delivered over 2 days

Day 1:

Introduction to Lean Accounting.
Key factors in Lean Accounting.
Lean vs Traditional Accounting.
Overview of Lean Accounting tools.

Day 2:

Practical application of Lean Accounting tools.
Evaluating VSM Future State options using Lean Accounting.
Target Costing as part of Lean Accounting.

Deliverables

- As part of the process we will provide all training material
- Facilitate the discussions
- Provide templates for reports
- Develop an implementation plan

Who should attend?

Lean Accounting is a strategic lean tool and we recommend that a cross functional team of senior managers are involved. We will help you review the participants during the assessment meeting to ensure you receive maximum benefit from the process.
