

# Overall Equipment Effectiveness

An integral part of any Total Productive Maintenance programme (TPM), Overall Equipment Effectiveness (OEE) focuses your improvement efforts on the right element of tool performance. Measuring OEE allows you to assess the true benefits of improvements made to reliability or process cycle-time.

Develops an understanding of the benefits of using OEE to assess the performance of individual processes and provide the knowledge to effectively use this tool to improve performance.

Our background in advanced manufacturing environments has allowed us to experience first hand the benefits and potential pitfalls in measuring equipment effectiveness.

OEE is the most commonly used means of assessing and improving process performance. It will help you benchmark performance internally and externally and improve output, resource utilisation and quality.

This workshop focuses on your data and how you can use it to improve performance of processes within your organisation. Our consultants avoid the jargon and show the real power of the tool in helping you to understand the contribution of the different types of loss to performance.

## Duration

**The OEE** workshop is a 1 day workshop split into theory and practical sessions.

### AM:

- Total Productive Maintenance & OEE
- Equipment related losses
- Achieving basic equipment conditions

### PM:

- How to measure & calculate OEE
- OEE Improvement tools & techniques
- Roles & Responsibilities.

## Deliverables

- OEE templates & calculators.
- An understanding of how to accurately calculate the contribution your equipment makes.
- The ability to effectively & efficiently target improvement activities.
- A methodology to determine capital requirements

## Who should attend?

This workshop will provide personnel responsible for the performance of machinery in production environments, with the ability to calculate true resource requirements, and will benefit Managers, Engineers, Maintenance Technicians and Change Agents. Organisations that have multiple equipment sets, expensive machinery, or are experiencing capacity constraints should be able to accurately calculate OEE or you may purchase equipment you don't need

To find out more about how The OEE workshop can help your organisation then contact us on

## Why Pragmatique?

Our portfolio of skills and experience enable us to deliver a workshop that will deliver real benefits for your business.

As we are independent we can drive the process, asking the difficult questions and not accepting the obvious answers to ensure you receive the full benefit from our involvement.

## About Pragmatique

Our successful clients describe us as a company of talented professional consultants with the knowledge & experience in areas of the business they need.

We provide consulting, training and interim support to enable our clients to get even better results from their people, their processes and their projects.

In short: we provide the know how to effect the change but leave you with the know how to develop our solution.

Visit our website to find out about all our service offerings and how we could help you.
