

The Seven Quality Tools

The Seven Quality Tools provide the foundation of problem solving in a continuous improvement environment, they are used from the manufacturing shopfloor to the office and through to the boardroom to get to the root cause of problems.

The tools can be used individually or combined to aid analysis and problem solving and ensure you get to the root cause of your issues.

Our consultants educate and train your people to effectively use the Seven Quality tools to solve 90% of the problems that you encounter on a daily basis. Each technique is highlighted using a real-life issue from your organisation ensuring participants are able to apply these new skills to immediate benefit.

Pragmatique have run this workshop for organisations in many sectors and many sizes. We have improved their skills and capabilities to deal with operational issues, improving productivity and quality with techniques that increase workforce engagement.

Unlike workshops that demonstrate the tools using scenarios we use real life and live examples from your organisation to embed the learning to the advantages of use in the workplace during the workshop, ensuring you see immediate benefit from your investment.

Duration

The Seven Quality Tools workshop is a 1 day workshop split into theory and practical sessions covering all the tools.

- Brainstorming
- Process Mapping
- Pareto Analysis
- Cause & Effect Analysis
- Checksheets
- Histograms
- Control Charts
- Scatter Plots

Real life, live examples from the workplace will be used where possible to enable an immediate connection of the learning with the workplace to improve sustainability.

Deliverables

- A deep understanding of the 7 Quality Tools and how to use them effectively.
- Forms, templates and questions to assist in the use of the tools..
- A change in attitude .

Who should attend?

This workshop introduces a process to enable effective identification of the root cause of problems in your organisation and is suitable for anyone involved in the implementation of Lean Thinking in your organisation. We will help you identify suitable real life and live problems to use as examples during the workshop to ensure you receive maximum benefit from the process.
